From entry to award.

Run photographic competitions with online entries, live scoring and connected offline judging.

Competition sections with running-order controls, scores and award badges. Demonstration entries.

Competition setup

Create print or digital sections, entry windows, rules, judge arrangements and scoring limits.

Online entries

Members submit photographs and titles, manage their entries and view published results.

Shared running order

Choose entry order, random, author, title or score order so the section list and scoring screen follow the same sequence.

Live judging

Score print and digital entries with single-judge or three-judge arrangements and a remaining-to-score count.

Projection display

Present photographs on a selected screen with full-screen viewing and controls for titles, authors and scores.

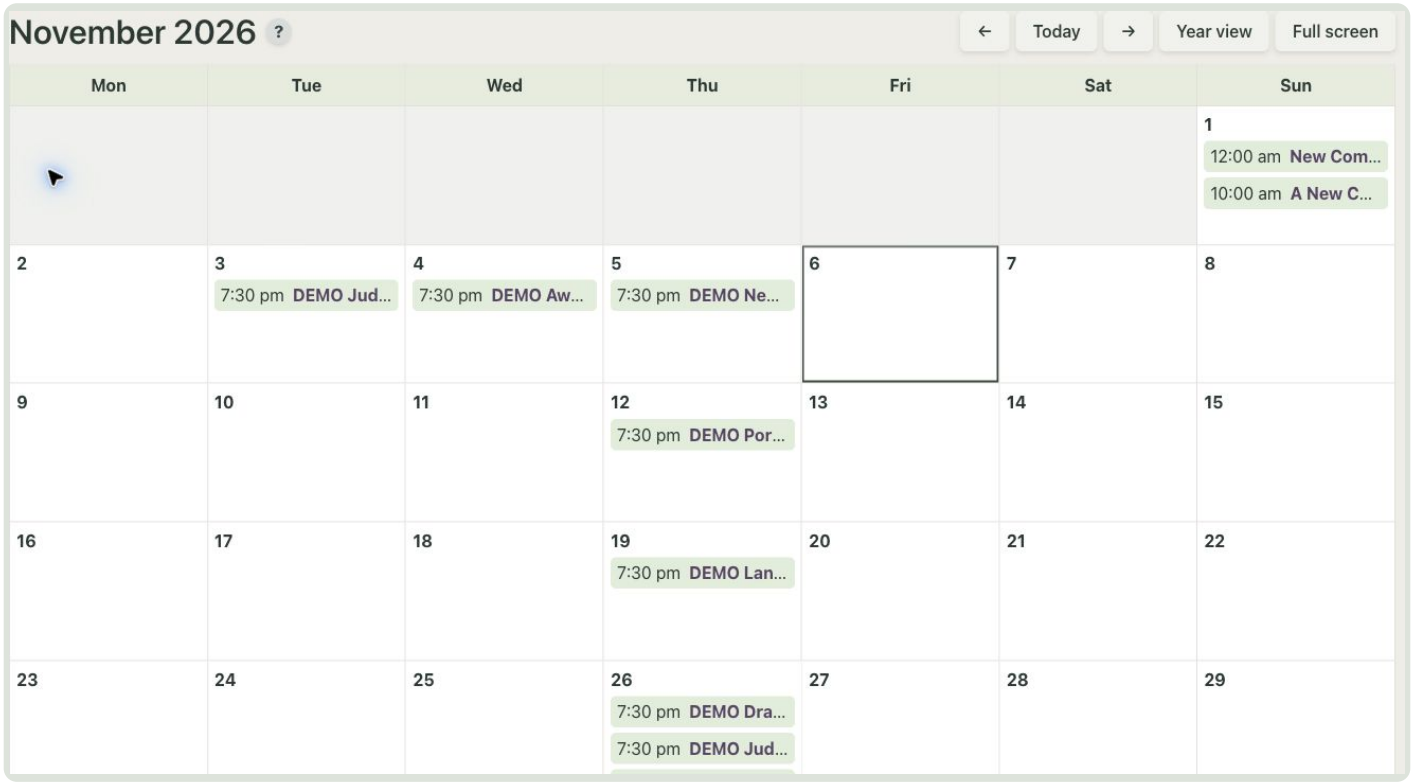

Awards and results

Allocate awards, display award badges, present awarded images and publish results for members.

Print workflow: Scan barcodes to select entries, and produce print labels and barcode reports with titles and authors.
Connected review: Select an image in the section list to show it in an active judging session.

Keep the season organised.

Plan the programme, manage recurring meetings and give members a clear view of what is coming up.

Monthly calendar with direct links to club activities. Demonstration schedule.

Activities and calendar

Organise meetings, lectures, workshops, photo walks and competitions; browse events by month or year.

Recurring schedules

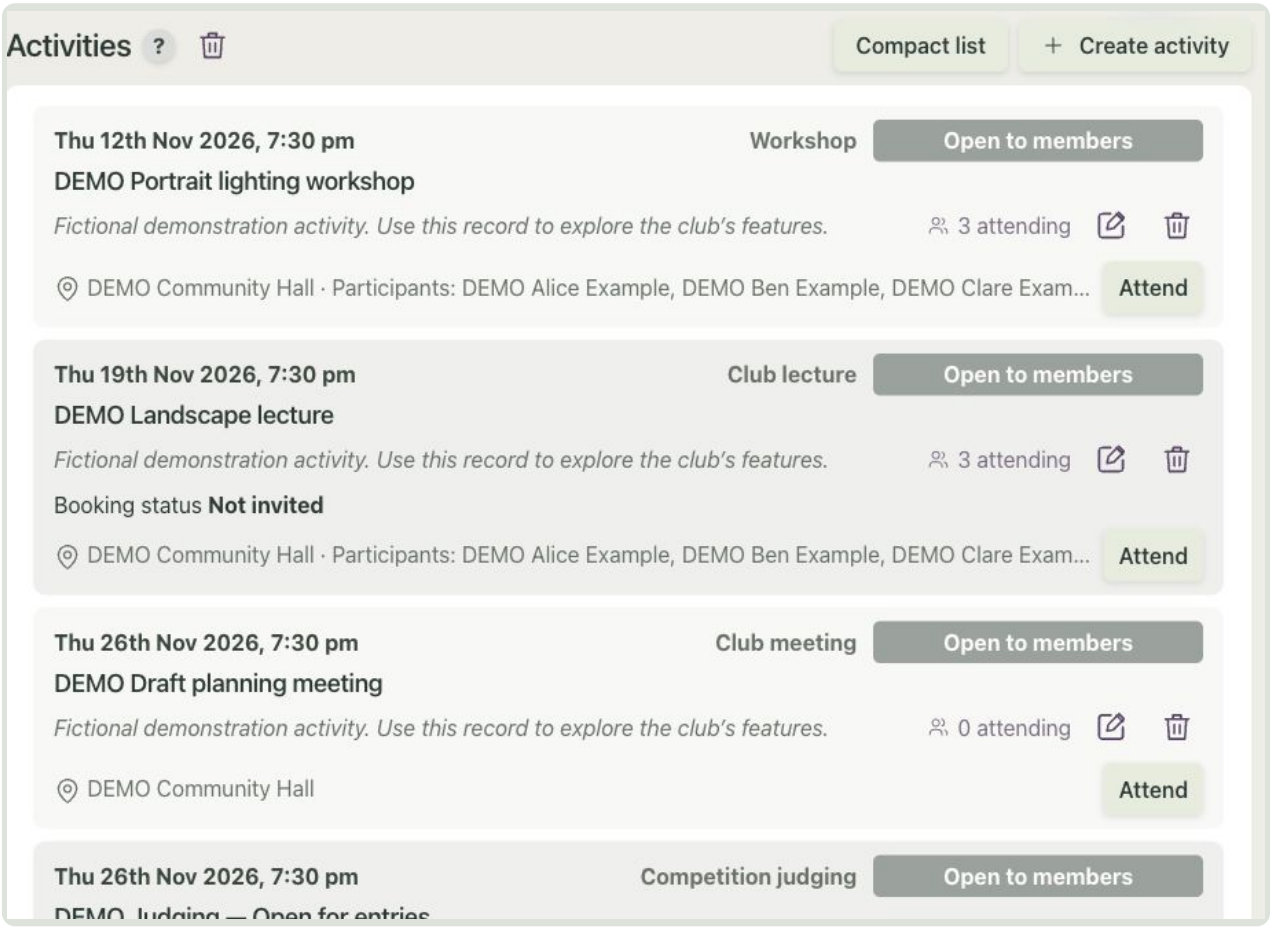

Prepare recurring activities and club closures, with draft activities activated by an administrator.

Member participation

Let members view activities, choose which to attend and see relevant club updates.

Make every meeting count.

Give members event details and attendance controls, with administration tools close at hand.

Activity list showing demonstration workshops, lectures and meetings.

Event details

Keep dates, times, venues and descriptions together for meetings, workshops, lectures and photo walks.

Attendance

Members choose the activities they plan to attend. Administrators can see participation alongside each event.

Drafts and activation

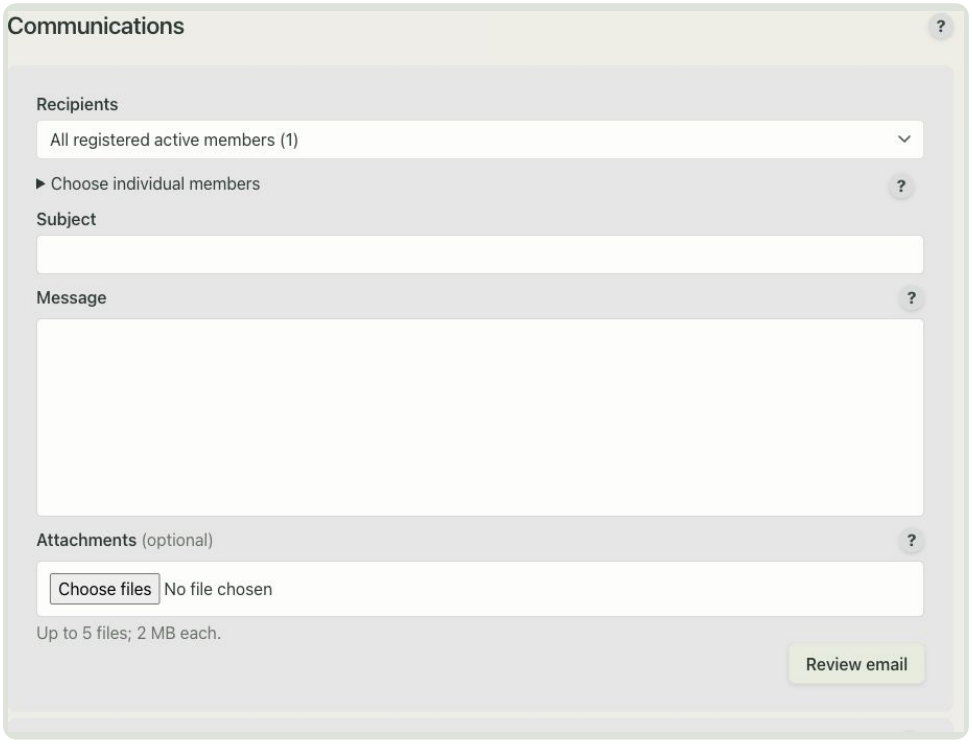

Prepare activities before making them available to members and public feeds.

Flexible programme

Edit activities, manage cancellations and maintain recurring meetings and club closed dates.

Keep members connected.

Manage membership records and send club announcements from the same workspace.

Compose a message, choose recipients, add attachments and review before sending.

Membership management

Invite and register members, maintain membership types, annual fees, renewals and payment records.

Club officers and leagues

Assign officer responsibilities and organise members into the club leagues used for competitions.

Member announcements

Email all eligible registered members, club officers or selected individuals, with formatted text and attachments.

Message history

Review recipients and sending status. Replies go to the administrator who composed the message.

Club accounts and access

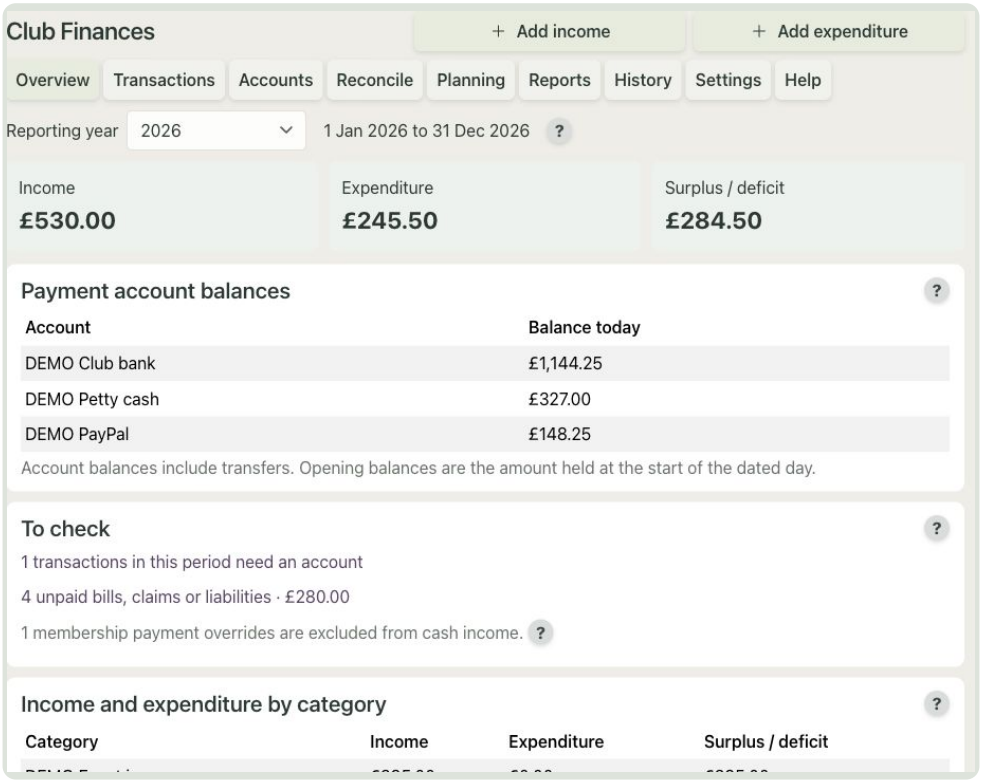

Manage multiple club accounts from one login, with administrator permissions and separate club records.

Private recipient emails

Each selected member receives a separate email. Replies return to the composing administrator.

A clear view of the accounts.

Bring income, expenditure, account balances and financial review into the club workspace.

Finance overview with account balances and items requiring attention. Figures are demonstration data.

Income and expenditure

Record receipts and spending by category, including membership payments and activity-related costs.

Payment accounts

Track bank, cash, PayPal and credit-card accounts with opening balances, transfers and refunds.

Statements and reconciliation

Import statement CSV files, match bank movements to transactions and reconcile account balances.

Planning and evidence

Maintain budgets, unpaid bills, claims, assets and liabilities; attach supporting receipts or invoices.

Reports and review

View financial reports, export transactions, print reports, approve accounting periods and grant read-only review access.

Accounts history and approval

Retain transaction history, approve completed periods and require a recorded reason to reopen them.

One club. A connected system.

Present your club online and take downloaded competitions into the meeting room for offline scoring.

A club heading with the standard site logo used when no club logo has been uploaded.

Your club online

Club identity and public page

Present your logo, description, contact details, meeting information and season dates with a choice of colour palettes.

Club web address

Request an optional clubname.datascribe.uk address that directs visitors to your public club page.

Contextual help

Use the shared Help panel and field-level explanations for guidance while working.

Club language - initial rollout

Primary administrators can choose English, French, German or Spanish. Shared navigation is translated; other pages currently fall back to English.

Continue scoring offline

Offline scoring apps

Download companion apps for Intel and Apple Silicon Macs, and Windows 10/11 x64, from the primary administrator account.

Connected competition downloads

Use the club API code to download competitions and images, score offline, then upload results when connected.

Download. Score. Reconnect.
Download the competition and photographs while online, score without a connection, then upload the results when connectivity returns.

Screenshots show the demonstration club. Feature overview: 6 November 2026. The language rollout currently covers shared navigation; untranslated pages remain in English.
